**Tools:** VS Code, MySQL Workbench, Eclipse

## EXPERIENCE

No prior Experience.

## PROJECTS

### Smart Parking Management System

Full-Stack Development | MIT ADT University | 2025

- Developed a full-stack parking reservation web app using TypeScript, Express.js, MongoDB, and React.
- Implemented secure user authentication with JWT and bcrypt password hashing.
- Designed RESTful APIs with Express and Mongoose for managing users, parking slots, and reservations.
- Built responsive UI with React, React Router, Tailwind CSS, and managed app state using React Context API.
- Validated inputs and secured protected routes with express-validator middleware.
- Enabled users to view parking availability, reserve slots.
